

# Weed Identification Timeline

May Ox-Eyed Daisy

Orange Hawkweed

Scentless Chamomile

June Tall Buttercup

July Common Tansy

Field Scabious

July

Himalayan  
Balsam

Canada Thistle

Perennial Sow Thistle

August

Yellow Toadflax

These are the most commonly found noxious and prohibited noxious weeds found in the Summer Villages. They are listed according to what month they become easiest to identify.

As regulations become more stringent and herbicide selection becomes more specialized, noxious weed identification becomes parative to effective weed management practices.
